DETAILED ACTION

1. Claims 1-14 were examined.

Allowable Subject Matter

- 2. Claims 1-14 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: While Sarrafzadeh et al., "Single-Layer Global Routing" teaches (claim 1) a method of forming a congestion map by calculating a probability that a wire path in a predetermined direction will be contained in a given area within a datapath, said method comprising: entering the probability on the congestion map, this reference, taken either alone or in combination, with the prior art of record discloses

(claim 1) "dividing the datapath into pre-determined areas to define said given area, calculating the mathematical expectations of full segments in the pre-determined direction for said given area in said datapath; calculating the mathematical expectations of partial in the pre-determined direction for said given area in said datapath; summing the mathematical expectations which have been calculated to determine the probability that a wire path in the pre-determined direction will be contained in the given area within the datapath,"

in combination with the remaining elements and features of the claimed invention. It is for these reasons that the applicants' invention defines over the prior art of record. Art Unit: 2123

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
